

What worked well today?

Opportunity to network,
lightning talks

Everything

Networking Single talk
track worked nicely.

Networking. Long lunch for
networking. Interactive
mentimeter and other thing

Talks and networking

Networking, lightning
talks

Short talk format was
nice. Also lunch activity
was good

Discussions, lunch,
lightning talks

What worked well today?

Lighting talks.
Networking.

Variety of talks, kept to time (ish). Networking opportunity

having time for networking, having food, I thought the lightning talks were a good length and I didn't get bored throughout (overall a good length of session too)

Networking and everyone friendly and interesting, nice length of meeting.

Talks and networking

Mostly very good

Amount of time for networking was good.

Enjoyed the variety of talks and the choice of park for lunch was nice

What worked well today?

Networking was really good and helpful, particularly for embedded RSEs who don't get to meet other RSEs that often. Lightning talks were also great.

- Enjoyed format of short talks so that there were plenty of breaks throughout day. - Good to have long in-depth talks. - Good idea to have lunch activity. - Padlet and menti work well.

Talks and networking

The discussion topics were very thought provoking, as evidenced by the number of questions and responses fielded by people

networking

Lightning talks were good.

discussion session setup

Excellent talks and networking

What worked well today?

Question and answer sessions prompted some good discussion. Non technical sessions gave some insight into issues affecting RSEs and how different organisations embed RSEs into research projects

Attendees from a range of organisations gave some perspective on common issues

Informal environment Great mixture of longer and shorter talks Discussion session was well delivered Lunchtime activity was fun!

What should be changed or added?

Keynote was maybe slightly too long.

Not sure

Opportunity for introductions for new members

More discussion

Just continue incorporating feedback from previous events, and let things evolve

Start slightly later (10:00?) to allow time for those who have children to drop off at school to travel.

Even more network time.

Technical problem solving session/groups for utilising our expertise?

What should be changed or added?

Day could have been a little longer.

Maybe a more in-depth technical talk.

Maybe some sort of group introduction of each person

Slightly later start time.
10:00-16:00 rather than
09:30-15:30 would aid travel.

maybe having an ice breaker or a way to encourage people to go to new people during networking

Some form of short activity at beginning that gets people to mix a little more and know who is here

Not sure

Presentations made available afterwards

What should be changed or added?

Given how discussion heavy the meeting became, perhaps a panel session could work well?

Another longer (15 min) technical talk

Hackathon?

Move group discussion about purpose/plan for RSE Sw to earlier in the day, to allow time for verbal input, instead of just a summary

Is there a good way to share a small bio and picture of people at the event. Sometimes I forget to jot the name of people down and it would be useful to be able to get people's email addresses

What should we not do again?

Coffee bags

N/A

Na

No changes from me, I was satisfied with how the format played out

N/a

N/A

Any other suggestions for the next event?

journal club during the conference

Na

Experiences as an RSE

See if uk hydrographic office can be involved in future. I think they might also be the right size for hosting and taunton seems a convenient central location

Panel discussion session as per my answer to no. 2

Great job, thanks for hosting!
